

Healthy Mouth Healthy Body

Everyone knows it's important to brush at least twice daily and floss regularly. But good oral hygiene impacts more than just your smile. Your dental health can greatly impact your overall health, and also your pocketbook.

Did You Know?

- As many as 120 physical illnesses can be detected during an examination of the mouth, throat, and neck - including diabetes and heart disease.
- Gum disease may be associated with other disease elsewhere in the body.
- For every \$1 spent on preventive oral care, as much as \$50 can be saved on future emergency and restorative services.
- The lifetime cost of a cavity can total more than \$2,000.
- Fluoride treatments and sealants are available for children to help prevent cavities.

Remember

- See your dentist regularly. Diagnostic and preventive services are covered through your Delta Dental Uniform Dental Benefit plan.
- Find a network dentist in your area. Go to www.deltadentalwi.com/state-of-wi and click on "Provider Search."
- Have a question about what is covered by your plan? Delta Dental benefit advisors are here to help! Call **844-337-8383**.

See Your Dentist Right Away If:

- Gums bleed often or pull away from your teeth
- Teeth are loose or separating
- You see red or white patches on gums, tongue, or mouth floor
- Mouth or jaw pain persists
- Mouth sores don't heal in two weeks
- You have problems swallowing or chewing
